## Fisheries Scientist (PANDORA Project)

An exciting opportunity has arisen within our Marine Science & Technology Department for an enthusiastic individual to deliver the pelagic industry self-sampling work-package that forms part of a large EU funded project (PANDORA).

The role will require close partnership working between the NAFC Marine Centre UHI, the Scottish Pelagic Fishermen's Association, Marine Scotland and the fishing industry. The aim is to recover existing fishing data and knowledge and to develop, implement and evaluate a self-sampling programme for continued fisheries data collection by the fishing industry. This will ultimately lead to both improved stock assessment and stakeholder engagement.

It is essential that the post holder has excellent communication skills and an ability and willingness to work with industry stakeholders, and has analytical skills and experience of working with large data sets.

The successful applicant will hold an MSc in a relevant fisheries subject or commensurate skills and experience.

This is a full-time post for a period of 36 months. Some travel and time at sea on board commercial vessels will be required.

A full job description, person specification and application documents can be obtained by contacting NAFC Marine Centre Reception or at:

**[www.nafc.uhi.ac.uk/vacancies](http://www.nafc.uhi.ac.uk/vacancies)**

Interested parties are encouraged to contact either:

Dr Chevonne Angus ([chevonne.angus@uhi.ac.uk](mailto:chevonne.angus@uhi.ac.uk), 01595 772000) or

Dr Steve Mackinson ([steve.mackinson@scottishpelagic.co.uk](mailto:steve.mackinson@scottishpelagic.co.uk), 07450 683963)  
for an informal discussion.

The closing date for applications is: **5pm Friday 22<sup>nd</sup> June 2018.**
